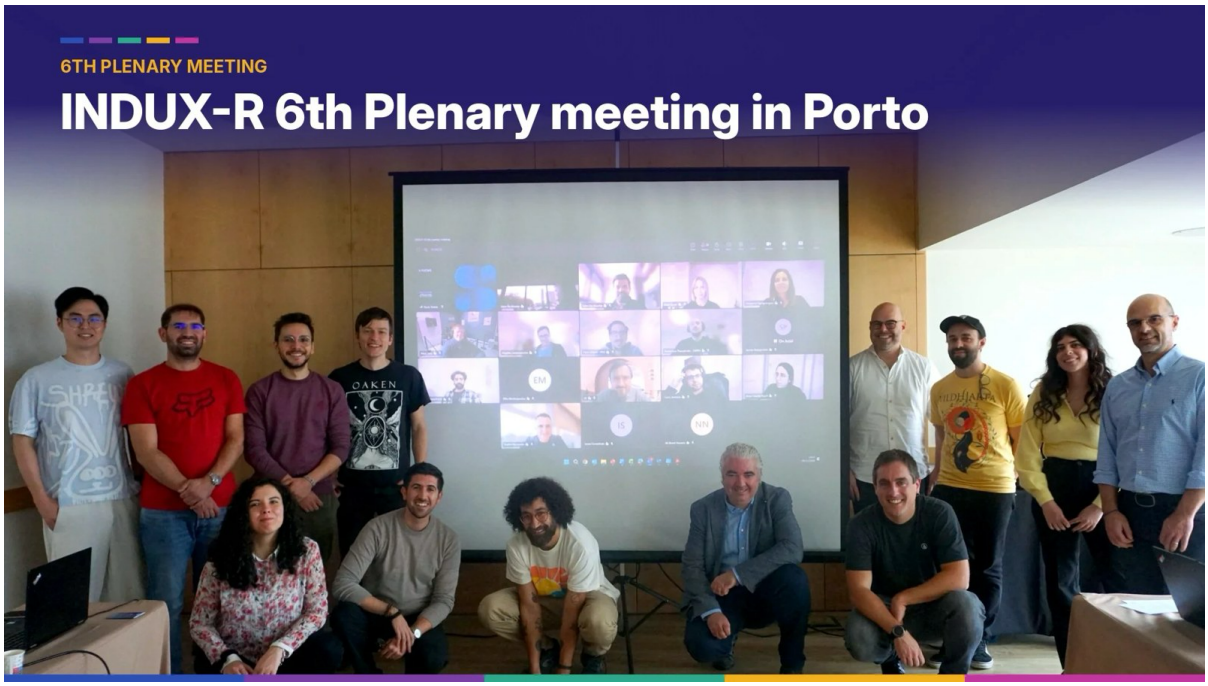
PRESS RELEASE

Porto, Portugal | 9 November 2026

INDUX-R

INDUX-R 6th Plenary meeting in Porto



The INDUX-R consortium convened in Porto for a dedicated plenary meeting focused on rehearsing the upcoming project review presentations. Partners walked through the progress across all Work Packages (WPs) and Use Cases (UCs), aligning on technical achievements, dissemination milestones, and final preparations ahead of the official review.

During the plenary, partners reviewed the core technical developments and results of the project, focusing on:

- **Core XR Technologies & Infrastructure (WP2 & WP3):** Reviewing breakthroughs in avatar personalisation, real-time soft-tissue interactions, human-centric perception, cognitive load assessment, and adaptive UIs, alongside the underlying FINoT data network, zero-touch 5G architecture, and open-source XR scene orchestration
- **Use Case Demonstrations (UC1–UC5):** Refining live and pre-recorded demonstrations across all five pilots to ensure crisp timing and clear storytelling.
- **Evaluation, Exploitation & Management (WP4, WP5 & WP6):** Assessing large-scale pilot KPIs (with final trials for UC3 and UC4 wrapping up in November), published scientific papers, and finalizing Intellectual Property Rights (IPR), standardisation contributions, and the Data Management Plan.

The plenary meeting yielded constructive feedback across all work packages, ensuring strong consortium alignment and confirming that the project remains on track to deliver on its objectives.
