

**EURECAT to present at VISAPP 2026 for INDUX-R: MExECON:  
Multi-view Extended Explicit Clothed humans Optimized via  
Normal integration**

New publication to be presented at [#VISAPP 2026](#) by **Eurecat** for **INDUX-R** | **9-11 March 2026**

**MExECON:**

Multi-view Extended Explicit Clothed Humans Optimized via Normal Integration is presented within the framework of the INDUX-R project, introducing a novel pipeline for high-fidelity 3D reconstruction of clothed human avatars from sparse multi-view RGB images.

To be presented at [#VISAPP26, March 9-11](#), <https://visapp.scitevents.org/> the method extends the single-view ECON approach to multiple views, improving geometry and pose estimation via joint multi-view body optimization—without any network re-training.

**About INDUX-R**

INDUX-R (Transforming European INDUstrial Ecosystems through eXtended Reality enhanced by human-centric AI and secure, 5G-

enabled IoT) is a Horizon Europe-funded initiative involving partners from across Europe. Its mission is to redefine how people interact, train, and collaborate in professional environments through cutting-edge XR applications rooted in ethical development.
